

GHS Hazard Communication Training Test
July 31, 2013

Please select the most correct answer to the questions below. Please return your completed test to the attention of Vince Dryer. Individuals will be sent a certificate of completion upon successful passage of this test (70% or better).

1. The OSHA Hazard Communication Standard as revised by the GHS governs the contents of labels and safety data sheets (SDS) for hazardous chemical products including commercial cleaning products.

True False

2. A “pictogram” is ...

- a) A square on point
- b) A graphic image that communicates the hazard
- c) Required to be on the label under the OSHA Hazard Communication Standard as revised by the GHS
- d) All of the above

Answer: **D**

3. A “hazard statement” on a label...

- a) Describes the type of hazard presented by the product
- b) Provides first aid instructions in the event of harmful exposure
- c) Directs the user to the SDS
- d) None of the above

Answer: **A**

4. Please select the hazard represented by the following pictogram:

- a) Explosive
- b) Flammable
- c) Corrosive
- d) Danger

Answer: **C**

5. Under the Hazard Communication Standard (as revised by GHS) the label is intended to provide an immediate visual indication of the hazards of the product, while the SDS provides more comprehensive information about a product’s hazards, precautionary measures, and other characteristics.

True False

6. The new SDS will present hazardous information about a product using a standardized 16-section format.

True False

7. Please select the hazard represented by the following pictogram:

- a) Flammable
- b) Radioactive
- c) Warning
- d) Under pressure

Answer: **A**

8. Workers can find the SDS based on the product identity or name on the label.

True False

9. The following is NOT required to be on the label under the GHS revisions to the OSHA Hazard Communication Standard:

- a) Product identifier or name
- b) Signal word
- c) Pictogram
- d) Net weight

Answer: **_D**

10. The signal word, hazard statement and pictograms for a hazardous chemical product will be the same on the label as they are on Section 2 of the SDS under the GHS revisions to the OSHA Hazard Communication Standard.

True False
